

**ABSTRACT**

A program product, method and system including machine readable code for accessing compositions, comprising: code for providing access to a plurality of user profiles, with each different user profile including a reference to a different composition store and a different graphics store; and code for selecting one of the plurality of user profiles. In one embodiment, the plurality of user profiles include an internal user profile including a reference to an internal composition store inside a firewall and a reference to a default internal graphic store inside the firewall; and an external user profile including a reference to an external composition store outside the firewall and a reference to a default external graphic store outside the firewall.
